

Word Problem: profit

Directions: Use the Design Recipe to write a function `profit` that calculates total profit from glasses sold, which is computed by subtracting the total cost from the total revenue.

Contract and Purpose Statement

Every contract has three parts...

:: ->

<i>function name</i>	<i>domain</i>	<i>range</i>
----------------------	---------------	--------------

what does the function do?

Examples

Write some examples, then circle and label what changes...

examples:

_____ (_____) **is** _____
function name *input(s)* *what the function produces*

function name (input(s)) **is** what the function produces

end

Definition

Write the definition, giving variable names to all your input values...

fun () :

function name *variable(s)*

end *what the function does with those variable(s)*
