

Converting Circles of Evaluation to Code

For each Circle of Evaluation on the left, write down the code on the right

	Circle of Evaluation	Code
1	<p>The diagram shows a circle of evaluation for the <code>ellipse</code> function. The function name <code>ellipse</code> is at the top. Below it, the arguments are listed: <code>30</code>, <code>20 + 30</code> (which is inside a smaller circle with a <code>+</code> operator), <code>"outline"</code>, and <code>"red"</code>.</p>	<code>ellipse(30, 20 + 30, "outline", "red")</code>
2	<p>The diagram shows a circle of evaluation for the <code>image-width</code> function. The function name <code>image-width</code> is at the top. Below it, the argument <code>rectangle(65, 16, "outline", "blue")</code> is shown inside a smaller circle of evaluation.</p>	<code>image-width(rectangle(65, 16, "outline", "blue"))</code>
3	<p>The diagram shows a circle of evaluation for the <code>circle</code> function. The function name <code>circle</code> is at the top. Below it, the arguments are listed: <code>num-sqrt(25 * 5)</code> (which is inside a smaller circle of evaluation with a <code>*</code> operator), <code>"solid"</code>, and <code>"green"</code>.</p>	<code>circle(num-sqrt(25 * 5), "solid", "green")</code>
4	<p>The diagram shows a circle of evaluation for the <code>text</code> function. The function name <code>text</code> is at the top. Below it, the arguments are listed: <code>"Spring time!"</code>, <code>4 * 5</code> (which is inside a smaller circle with a <code>*</code> operator), and <code>"pink"</code>.</p>	<code>text("Spring time!", 4 * 5, "pink")</code>
	<p>The diagram shows a circle of evaluation for the <code>text</code> function. The function name <code>text</code> is at the top. Below it, the arguments are listed: <code>"Spring time!"</code>, <code>4 * 5</code> (which is inside a smaller circle with a <code>*</code> operator), and <code>"pink"</code>.</p>	<code>text("Spring time!", 4 * 5, "pink")</code>
