

# Function Cards

Print and cut these out, for use with the unplugged `.filter` activity in this lesson. You can make up your own using the blanks provided at the bottom!

<pre># has-glasses :: (s :: Student) -&gt; Boolean # consumes a student, and produces true if they are wearing glasses</pre>	<pre># is-taller :: (s :: Student) -&gt; Boolean # consumes a student, and produces true if they are taller than you</pre>
<pre># has-long-hair :: (s :: Student) -&gt; Boolean # consumes a student, and produces true if they have long hair</pre>	<pre># has-red-hair :: (s :: Student) -&gt; Boolean # consumes a student, and produces true if they have red hair</pre>
<pre># is-shorter :: (s :: Student) -&gt; Boolean # consumes a student, and produces true if they are shorter than you</pre>	<pre># is-smiling :: (s :: Student) -&gt; Boolean # consumes a student, and produces true if they are smiling</pre>
