

# Creating a Scatter Plot

1. For each row in the Sample Table on the left, add a point to the scatter plot on the right. The first 3 rows have been completed for you. Use the values from the age column for the x-axis, and values from the weeks column for the y-axis.
2. Do you see a pattern? Do the points seem to shift up or down as age increases? Draw a line on the scatter plot to show this pattern.
3. Does the line slope upwards or downwards? downward
4. Are the points clustered around the line? Loosely scattered?  
loosely scattered
