

# Welcome to Alice's Restaurant!

Alice has hired you to improve some code used at the restaurant. The code we'll be improving on is shown below.

**Read through the code line-by-line with your partner before writing down your observations in the tables below.**

```
; cost : String -> Number
; given a item, produce the cost of that item
(define (cost item)
  (cond
    [(string=? item "hamburger")    6.00]
    [(string=? item "onion rings")  3.50]
    [(string=? item "fried tofu")   5.25]
    [(string=? item "pie")          2.25]
    [else "Sorry, that's not on the menu!"])))
```

1) I notice...

2) I wonder...

3) Familiar things I see in the code

4) Unfamiliar things I see in the code
