## Word Problem: update-player

Directions: The player moves up and down by 20 pixels each time. Write a function called update-player, which takes in the player's y-coordinate and the name of the key pressed ("up" or "down"), and returns the new y-coordinate.

| Contract and Purpose Statement |                               |                              |                            |    |
