Alice's Restaurant - Explore

Alice's code has some new elements we haven't seen before, so let's experiment a bit to figure out how it works! **Open the** "Alice's Restaurant starter file, click "Run", and try using the cost function in the Interactions window.

1) What does cost("hamburger") evaluate	to?		
2) What does cost("pie") evaluate to?			
3) What if you ask for cost("fries") ?			
4) Explain what the function is doing in your own words.			
5) What is the function's name?	Domain?	Range?	
6) What is the name of its variable?			
7) Alice says onion rings have gone up to \$3.75. Change the cost function to reflect this.			
8) Try adding menu items of your own. What's your favorite?			
9) For an unknown food item, the function produces the String "That's not on the menu!"			
Is this a problem? Why or why not?			
10) Suppose Alice wants to calculate the price of	f a hamburger,including a 5% sa	<i>les tax</i> . Draw a Circle of Evaluation for th	ne

expression below.
