Word Problem: sunny?

Directions: Use the Design Recipe to write a function `sunny?`, which takes in a forecast and determines if it is sunny

Contract and Purpose Statement

Every contract has three parts...

; `sunny?` :   `String`   `->`   `Boolean`

       function name   *domain*   *range*

; Consumes a forecast and returns true if it is sunny

                                     what does the function do?

Examples

Write some examples, then circle and label what changes...

(EXAMPLE (`sunny?`   `"sunny"`   ) `(string=? "sunny" "sunny")`   )

           function name   *input(s)*   *what the function produces*

(EXAMPLE (`sunny?`   `"rainy"`   ) `(string=? "rainy" "sunny")`   )

           function name   *input(s)*   *what the function produces*

Definition

Write the definition, giving variable names to all your input values...

(define (`sunny?`   `forecast`)

         function name   *variable(s)*

   (string=? forecast "sunny")   )

                  what the function does with those variable(s)
